

Hangman

Difficulty:	Very Hard
Requirements:	All you learned in C-Introduction
Aims:	Apply your knowledge

Write a simple hangman game! Everytime the player is wrong, add a new part to the gallows / the hanging man and print it to the terminal:

```

      -----
      |/  o
      |  ^W^
      |  /\
      |
      -----
     /\
    /\
   /\
  /\
 =====

```

word: game o_e_
wrong: hfnwitic

Experts: Have a list of possible words in the source code and let the program randomly choose one at the start.

Hints

- `strcmp()` compares two strings.
