Feedback

Difficulty:	Hard
Requirements:	Variables, input/output, conditions, ASCII
Aims:	Make decisions during run time, get to know ASCII more

- Write a program, that asks the user to enter a character and answers whether the input is a letter, a number, or a special char.

- **Experts:** If the character is a small letter, also print the capital letter and vice versa.

Hints

- Have a look at the ASCII code table.

- **Experts:** Have a closer look at the ASCII code table
